REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render obviousness a tamper-resistant modular multiplication method comprising a step of randomly selecting either calculating multiplication as $A*B*R^{(-1)} \bmod N$ according to the Montgomery method or calculating the multiplication differently; a step of repeating the above steps for calculating a final result of a modular multiplication as cited in independent claims 1, 5, and 9.

The closest found prior art is Nakada (U.S. 5,961,578). Nakada discloses a method of computing modular multiplication according to the Montgomery method. However, Nakada does not disclose a second method of computing the modular multiplication and particularly a step of randomly selecting either the first or second calculation method of the modular multiplication as cited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
